THE CUSTOMS TARIFF

Under the Customs Tariff Ordinance, 1930 (No. 16 of 1930).

(As amended by Ordinances Nos. 30 and 48 of 1931; Nos. 9 and 31 of 1932; No. 13 of 1933, No. 9 of 1934, No. 2 of 1935 and No. 22 of 1937, No. 30 of 1939, No. 45 of 1940, No. 19 of 1944, and further amended by (War Revenue) (Surcharge) Ordinances Nos. 29 and 45 of 1940, No. 24 of 1941 and No. 26 of 1942 and under Defence Regulations, Government Notices Nos. 52 of 1941 (as amended) 405 of 1942 and No. 81 of 1945 (exempting certain foodstuffs from duty).

For the purpose of assessing the amount of any customs duty, the value of goods for purposes of duty shall be taken to be the price which the importer would purchase the goods at the port or place of importation, freight, insurance, commission and all other costs, charges and expenses incidental to the making of the contract of sale and the delivery of the goods at that port and the expression "freight" shall be deemed to include postage subject to the proviso that notwithstanding anything hereinbefore contained, in the case of goods conveyed by air the amount to be added in respect of freight to the value for the purposes of assessment of duty shall be calculated at a figure not less than one-fourth of the freight charges actually paid on such goods and not more than the amount of such freight charges:

Provided that the value of goods arriving in the original coverings in which they were exported from the country of manufacture or shipment, for importation at any inland customs station in the Territory, shall be ascertained as though the place of importation were the first port of entry on the east coast of Africa.

GENERAL NOTES.

The headings of the respective classes in this Schedule are used only for convenience of classification, and shall not in any way affect the interpretation of the Tariff.

"n.e.e." means "not elsewhere enumerated."

The term "in bulk," when it appears in the Tariff, means—

- (a) goods loose without packing, or loose in barrels, casks, or any other single outside package, but not including goods imported by parcel post;
- (b) when in internal packages, that the net contents of any immediate container of goods weigh not less than ten pounds or measure not less than one imperial gallon.

Goods chargeable with duty by weight are, except where otherwise provided for, charged with duty on the net weight, which may be arrived at either by weighing net, or deducting from the gross weight the actual tare or an average tare agreed to by the importer.

Tins, jars, bottles and other receptacles of reputed weight or content to be deemed not less than such weight or content.

Twenty-four reputed half-pints, twelve pints, six reputed quarts, or four reputed imperial quarts to be deemed to be not less than one gallon.

Cement in packages of not less than 350lb. and not more than 400lb. to be deemed 400lb.

Oils and motor spirits in ordinary reputed two five-American-gallon or ten one-American-gallon tins to be deemed to be not less than eight and one-third imperial gallons, and two reputed four-gallon tins to be deemed to be not less than eight imperial gallons.

"Proof" shall mean the strength of proof as ascertained by Syke's hydrometer.

"Proof spirits" shall mean spirits which, at a temperature of fifty-one degrees Fahrenheit, weigh twelve-thirteenths of an equal volume of distilled water at the same temperature.

CUSTOMS—*contd.*

A complete article imported in an unassembled condition, except where specially provided for, is liable to the rate of duty which would be applicable to that article if imported in a fully set up condition, notwithstanding that the constituent parts are packed separately and are separately provided for elsewhere in the Tariff.

Integral parts of an article which is liable to an *ad valorem* duty, or is free of duty, imported for replacement purposes, or as spare parts, shall be liable to the same rate of duty as the article itself, or free of duty, as the case may be, unless they are specifically excluded, or provided for elsewhere, in the Tariff.

(B) WAREHOUSE CHARGES

(Under Railways Regulations)

The following rates for the warehousing of goods at the ports of Dar es Salaam, Tanga, Mwanza, Pangani, Bagamoyo, Kwale, Tirene Bay, Kilwa Kivinje, Lindi, Mikindani, Musoma, Bukoba and Kigoma have been made by the Railway Administration with the approval of the Governor under section 6 (e) and (r) and section 33 of the Railway Ordinance (No. 45 of 1931):—

1.—IMPORTS

Storage Charges on Imported Cargo and Merchandise

On and from the 1st September 1941, the following storage charges will be levied on all imported cargo and merchandise, excluding explosives and dangerous goods, warehouse accommodation for which is not provided, subject to a free period of five days (excluding Sundays and Public Holidays, and other days when Customs duties may not be received), calculated from the date that the warehouse is declared open for delivery:—

I. TRANSIT SHED STORAGE.—For the first six days, cents 2 per day or part thereof or each two cubic feet or 112 pound (1cwt.) whichever shall yield the higher charge.

After the first six days, the above charges per day or part thereof will be doubled, until transfer of goods to the King's Warehouse."

II. STACKING GROUND STORAGE.—Half the above charges.

NOTE.—Where a consignment of less than one ton is stacked, part in shed and part on a stacking ground, the minimum charge applicable to the location of the larger quantity shall apply to the whole.

III. STORAGE OF EXPLOSIVES IN PORT LIGHTERS.—A free period of twenty-four hours will be allowed, after which a charge of Shs. 1/50 per ton per day or part thereof will be levied.

Ton=Bill of Lading ton for steamer cargo at coastal ports, deadweight ton for steamer cargo at lake ports and dhow cargo at all ports.

2. The Chief Port Authority may grant such extension of the free period or such reduction in the charges in such special circumstances as he shall think fit.

3. The application of these charges has been approved by the Governor under the authority of section 25 of the Ports Ordinance which came into force on the 1st May 1941 by virtue of the Ports (Amendment) Ordinance, 1939.

4. The Chief Port Authority reserves the right to refuse to warehouse any of the following goods:—

Provided that where the value, on which the duty is payable, of the property on the second death exceeds the value, on which the duty was payable, of the property on the first death, the latter value shall be substituted for the former for the purpose of calculating the amount of duty on which the reduction under this section is to be calculated.

Fixed duties may be paid:—

- (a) if the gross value of the estate does not exceed three hundred pounds, a fixed duty of thirty shillings, or
 - (b) if such gross value does not exceed five hundred pounds, a fixed duty of fifty shillings.
- Estate duty does not apply to the estate of a person who at his death is living in a communal state in a native tribe.

| All other species of trees | ... | ... | ... | ... | ... | ... | ... | ... | 40 |

When the timber is cut at a place which is more than ten miles by the nearest practicable route from any point on the Tanganyika Railways and their branches, or from any recognized port on the coast or on the lakes Victoria, Nyanza, Tanganyika and Nyasa the above rates shall be subject to a general reduction of one per cent for every mile by which the distance exceeds ten save that such reduction in the whole shall not exceed fifty per cent. The Conservator of Forests shall have absolute discretion in deciding what is the nearest practicable route for the purpose of calculating the said reduction.

The measurement will be by cubic foot of sound bole calculated in the case of standing trees from the $\frac{1}{4}$ -girth at breast height (4ft. 7in.), and the timber height from the ground with employment of suitable form factors.

The contents of fallen trees will be calculated from the mean $\frac{1}{4}$ -girths and lengths of the merchantable logs they contain.

Timber too unsound to measure in the bole will be split and sold by stacked measurement and royalty payable in respect of such timber will be subject to a reduction of twenty-five per cent of the royalty prescribed for the species.

Unless otherwise stated all Crown and branch wood is the property of the purchaser of the bole.

At the discretion of a forest officer dead and refuse timber will be sold at half the above rates.

Provided that any person paying royalty on cedar wood after the 31st July, 1924, shall be entitled until further notice to a refund calculated in the manner set out below, on satisfying the Conservator of Forests that such cedar wood has been exported in the form of pencil slats and billets, and sold to or for the account of pencil manufacturers.

The amount of the refund shall be calculated from the actual cubic contents of the slats or billets exported. For this purpose a case containing 4,800 six-ply slats or a proportionate number of billets will be considered to measure twelve and one-half cubic feet.

(3) WEIGHTS AND MEASURES

Weights and Measures in common use and their equivalents in Imperial Weights and Measures

WEIGHTS AND MEASURES

Before the introduction of the decimal system of weights and measures by the late German Government the following standard weights and measures were in use among the natives:—

| CAPACITY | |
|---|--|
| 1 Kibaba equal to about 1 pint or 1½lb. | |
| 1 Pishi " " 4 Kibaba | |
| 1 Frasila " " 6 Pishi | |
| 1 Jizla " " 10 Frasila | |

| WEIGHT | |
|------------------------------|--|
| 1 Ratili equal to about 1lb. | |
| 1 Wakia " " 1oz. | |

| LINEAR | |
|---|--|
| 1 Shibiri equal to about 9 inches: roughly based on the span with the thumb and little finger extended. | |
| 1 Mkono " " 18 " calculated on the length from the finger tips to the elbow. | |
| 1 Wari " " 1 yard | |

The late German Government, about 1910-11, introduced the litre and metre as a standard measure.

The natives, however, continued to use the terms "pishi" and "kibaba" to denote the new measures of 4 litres and 1 litre capacity, although the metric measures were of greater capacity than the actual native measures.

There exists also an unofficial but universally recognized unit of measure known as the "debo". This term is applied to the European kerosene tin which, in consequence of its suitability for head portage, has been adopted by the natives as a convenient receptacle for the conveyance of grain to market.

On the introduction of the metric system by the late German Government the official unit of weight became the kilo, and both the native measure "ratili" (pound) and the kilo are now in common use in the native market.

As from the 15th July 1931, the Weights and Measures Ordinance came into force under which the following official weights and measures for the Territory were laid down:—

| | | |
|-------------------------------|--------|-----------------------|
| (a) Primary measure of weight | | The pound avoirdupois |
| (b) " " capacity | | The gallon |
| (c) " " length | | The yard |
| (d) " " surface | | The square yard |

After the commencement of the Ordinance and unless otherwise permitted all transactions in the Territory involving weights or measures are required to be made in accordance with the official weights and measures of the Territory or in accordance with the weights and measures of the metric system.

Subject to regulations prohibiting the same, however, the local or customary measures used by natives may be used as heretofore.

Method of Compilation of Statistics

“Value” in the case of imports is the value of the goods landed in Customs premises at the port of first entry. The value of exports is that declared by the shipper as the value of the goods on board the exporting vessel.

“Country of Origin” means, as far as can be ascertained, the country in which the goods were grown, produced or manufactured. When the place of actual origin cannot be determined the goods are shown as originating in the country from which they are consigned.

“Country of Consignment” is shown, where possible, as the country for which the goods are finally destined. In most cases this is necessarily taken to be the country declared on the relative export entry. When goods are declared for export to a specific port with optional discharge at ports in other countries, the country of the first-named port is recorded as the country of consignment.

“Total Imports” includes goods—

- (a) declared direct ex-ship,
- (b) entered for warehousing,
- (c) imported for Government use,
- (d) imported and subsequently re-exported, but does not include goods entered for direct transshipment or in transit.

(d) General Information Regarding the Industry and Possibilities of Development.

The best comparison in the position regarding timber exports is probably with 1939, the last year in which pre-war conditions prevailed. It will be noted that in 1945 the annual cut was more than five times as great as in that year. Other types of forest produce follow the annual pattern more or less closely, but there are notable increases in the amount of mangrove bark and of beeswax exported.

The change over to a complete peace time economy was retarded somewhat by the continuation of Timber Control which was in turn due to continuing military orders.

Apart from supply to the Military, concentration was still on fulfilment of purely local as against export orders, only a small fraction leaving the territory. The various schemes of postwar development will continue to absorb very considerable quantities although there seems no reason to suppose that supplies from local sources will prove insufficient for such demands in the future. Expansion would however be more readily possible if exports to the territory of essential machinery and equipment, both of which have suffered from hard usage during the war years, were more readily available.

The mvule concession in the Tanga Province continued to work, though not at high pressure, while the proposed Rondo area is still being kept in reserve until the necessary supervisory staff is available.

Under (a) a more correct assessment of the territorial area under forest has been made and is included for the first time. The figures are most tentative and require a great deal of verification before they can have much value; but it is considered that statistics which ignore the vast dry forest zone, which contains more than one valuable luxury timber as well as many utility timbers, are of even less value than the present attempt at classification.

Thus it will be noted that the area under forest of some kind is now estimated to be about 30 per cent of the territorial land area and that the total area under Concessions for all types of forest produce is about 47,000 square miles or approximately 14 per cent of the land area.

There are signs of a recrudescence of interest in many parts of the territory, in many forms, particularly of minor forest produce.

A good quantity of Small Fry fish is caught on Lake Tanganyika and dried; its export is mostly to Belgian Congo. The fishing in this Territory is conducted almost entirely by natives by means of lines, traps, stakes and nets. |

5. WATER POWER.

The use of the rivers of the Territory to supply electrical energy for townships and industries has been developed in the following areas:—

- (a) On the major falls of the Pangani River an installation was brought into use in February 1936 to supply up to 5,000 kilowatts. This serves the townships of Tanga, Pangani, Korogwe, Muhesa and Lushoto, together with about forty-two factories for the decortication of sisal within a radius of sixty miles of the falls. The installed capacity is now being increased to 12,500 kilowatts to meet increasing demands in the area and also to export energy to Mombasa. This undertaking is operated by the Tanganyika

Electric Supply Company Limited, under Government Licence.

- (b) Smaller privately-owned plants at Hale and Makinyumbé also use the Pangani River to generate power for sisal factories.
- (c) The Kikuletwa River is utilized at a point about fourteen miles from Moshi to supply power for sisal factories, coffee curing works and flour mills, in addition to the general lighting and power throughout Moshi township.
- (d) The Sigi River is used by the East African Agricultural Research Station to generate an electrical supply for lighting and power to the laboratories and staff residences at Amani. The installed plant capacity is 72 kilowatts.

7. SUMMARY OF INDUSTRIAL DEVELOPMENT

Agriculture.

Following the outbreak of war production of sisal, the principal plantation crop, was reduced owing to loss of the continental markets, but the industry revived with the fall of Manila and Java following Japan's entry into the war, and production and prices steadily rose. Actual production figures were 1941, 51,640 tons; 1942, 99,024 tons; 1943, 102,369 tons; 1944, 111,313 tons; 1945, 112,218 tons.

Average exports of coffee were maintained, though the 1935 record of 18,588 tons was not reached.

The cotton production of the Lake Province was above the average of the previous six years, being 35,378 bales, but the Eastern Province experienced almost the worst season on record, production being 4,835 bales against the average of the previous six years of 13,281 bales. Total production of cotton was

41,408 bales, a rise from 24,797 in 1944, but below the six year average of 52,647 bales.

Groundnut exports reached their highest point in 1936 with a figure of 22,786 tons—1945 was almost the lowest with only 955 tons shipped. The decline is due to increased consumption and a succession of poor seasons, coupled with increased attention by the peasant to other crops, mainly rice in the Lake Province.

Exports of tea were maintained but sugar dropped owing to increased local consumption and the effects of a poor season. Copra exports were very low owing to increased local consumption, but pyrethrum, wheat and beeswax exports established new records in 1945.

The following export figures of the principal agricultural products of the territory enable production to be compared with the pre-war year 1913:—

| | 1913 | | 1942 | | 1943 | | 1944 | | 1945 | |

Veterinary Science and Animal Husbandry.

The Veterinary Departments is administered under the Director of Veterinary Services from the headquarters at Mpwapwa.

At the beginning of 1945 a new post of Deputy Director was created, and the establishment was further increased to meet the demands of extending activities.

The department is responsible for:—

- (a) the control of animal diseases,
- (b) the development of the animal industry and cattle marketing in the Territory.

Rinderpest.—A large-scale inoculation campaign against rinderpest enabled the disease to be pushed northward of the Central Railway line. A rinderpest conference in Nairobi which was attended by veterinary representatives from the Union of South Africa and Southern Rhodesia expressed confidence in the control measures which have been taken by the Tanganyika Territory Government for the prevention of the spread of rinderpest to the southern half of Africa. Later an unusually virulent outbreak occurred and was suppressed in Tanga Province. Inoculation campaigns were organized in the Lake Province from Maswa to the shores of Lake Victoria, and in Loliondo. Two and a quarter million injections were given during the year throughout Tanganyika.

Bovine Pleuro-Pneumonia.—The position regarding this disease has improved. The Lake Province, as a result of three years of intensive inoculation, appears to be free of bovine pleuro-pneumonia and most of the quarantines have been lifted; and a further two were released in Tanga Province. Two new outbreaks were recorded in the Northern Province and 130,000 head are still in quarantine. Culture strain 6110 is a valuable new vaccine against this disease.

Tick-borne Diseases.—There is little new to report but land-dressing has proved popular and reasonably effective against East Coast Fever infection.

Rabies.—All quarantines were lifted in 1945.

Animal Husbandry.—The year was fairly satisfactory for livestock but the short rains were light. Grazing reserves were greatly increased in numbers and area, and improved water supplies were made in many places and especially on stock routes.

Livestock Marketing.—Of the 6,000,000 cattle in the Territory 275,379 were sold by the Veterinary Department on primary markets. The average price rose by Shs. 7/- to Shs. 54/- per head.

Other major activities embraced livestock breeding, ghee production and hides and skins improvement.

Veterinary Education.

The training of Africans in the elements of anatomy, physiology and diseases of the domesticated animals has been suspended until further European staff is available.

There are now twenty-three African Veterinary Assistants in the department and so far they have acquitted themselves with credit, they form a very valuable aid to the department both in the field and at the laboratory.

SURVEYS

Surveys carried out during the year were either of a cadastral nature or undertaken in anticipation of major developments in the immediate post war period. Out-turn of surveys was however small, as the very large proportion of the field staff serving with the forces had, with one or two exceptions, not been released by the War Office at the end of the year.

The main areas topographically surveyed were as follows:—

Locality: Central Line railway to Mpanda Mine.
Area surveyed: 2,750 square miles.

Reconnaissance survey for proposed railway line.

Locality: Uvinza and Malagarasi River.

Area surveyed: 190 square miles.

Survey of River.

Locality: Mpwapwa-Kidete-Kilosa.

Area surveyed: 315 square miles.

Land utilization.

River flows were also measured on the Malagarasi River and on a stream in the Kidete-Kilosa areas.

One observation for magnetic variation was taken during the year at Dar es Salaam. The variation which has apparently reached a minimum value and has been stationary for a number of years still shows no sign of increasing again.

An Anson aircraft was purchased during the year for use in air photography. Films in stock proved to have deteriorated but it is anticipated that a large amount of air photography will be undertaken as soon as new supplies are received.

Some cadastral work was undertaken during the year and one licensed surveyor returned to the Territory. These surveys were mainly of mining leases or of small properties in the vicinity of townships.

The total number of lithographic prints made by the map production section was nearly double that of 1944 and totalled 76,065 including air strip maps on a scale of 1 in 1 million and proof sheets of the Central Province Provisional series on 1/250000. Issues of maps, plans, etc., reached the high level of over one hundred thousand.

GEOLOGY

Three geologists were available most of the year and a fourth for part of it; two metallurgists were in the laboratory throughout the year.

The principal geological activity of the year has been the examination of the rocks and the recording of the data exposed by the surface and underground prospecting of the Namwele (Ufipa) Coalfield and the search for new coal areas involving the supervision of diamond drill holes in the north-western Rukwa valley. Ninety-six coal samples were analyzed and very numerous ones subjected to other tests. Steaming tests on the Railway were observed.

2,000 square miles in the Eastern and Southern Provinces were covered by geological reconnaissance in the latter part of the year as the commencement of the programme of completing the geological map of the Territory, even if only on reconnaissance standard, so that the possible mineral-bearing areas may be defined and their value assessed.

Detailed work was done on estimating the ore reserves and commencing a study of the economic geology of a very large lead deposit. A hundred tons of graphite ore were mined and transported to Dodoma ready for treatment next year. An apatite limestone occurrence of large size possibly of use as a fertilizer was examined.

The Dodoma geological buildings were extended to accommodate further metallurgical machinery and expansion of the collections. A complete new continuous ore testing plant arrived and erection was commenced. Important results are hoped for from this modern outfit for the benefit of the mining industry.

A paper on the mining geology of the Iramba-Sekenke goldfield was published in the Bulletin of the Imperial Institute. A pamphlet on the assaying of gold and silver was published and a paper on the local manufacture of abrasive articles (hones, slipstones, wheels) was prepared. Twenty-one mineral resources pamphlets were published in typescript.

The laboratory work increased in quantity and scope. Mineral dressing tests were carried out on coal, garnet, kyanite, corundum, phosphate and gold. Tests on building materials (clay, bricks, tiles, cements) and on ceramic clays were continued. Experiments were made on the preparation of salt-lick bricks for cattle,

the extraction of sodium sulphate from salt lake crusts, the treatment of apatite by calcination with soda to improve its fertilizer qualities. Approximately a thousand determinations varying from complete analyses, through assays for gold and silver, to conductivity estimation of salinity of water were done in the year. The abrasives factory closed at the end of the war having made in all 88,000 articles of which 82,700 were urgently needed slipstones for the rubber industry. 101,000 slate pencils were made from local soapstone to meet a shortage.

LAND

The Government's policy of refusing to alienate land on long term grants for agricultural and pastoral purposes, except for special reasons, during the period of the War, has been adhered to during 1945.

In the result only six long term Rights of Occupancy were granted either on sub-divisions of or as additions to, existing units and involved the alienation of new areas totalling 958 acres approximately.

On the other hand 15 short term Rights of Occupancy over agricultural and pastoral land comprising an area of 3,342 acres approximately were issued on the standard conditions applicable to short term Rights of Occupancy granted for food production.

The largest single alienation during the year was a short term Right of Occupancy granted for pastoral purposes in the Northern Province (Moshi District) on a year to year basis over an area of 2,625 acres.

Surrenders, revocations and expirations of Rights of Occupancy granted, for agricultural and pastoral purposes numbered 9, totalling 5,175 acres. Of this area, 3,500 acres were surrendered in order to effectuate the sub-division into two separate Rights of Occupancy of a single existing Right of Occupancy.

The following tables set out the alienations, surrenders, revocations and expirations of Rights of Occupancy in the above-mentioned class during the year in respect of each Province:—

| Province | Table I | | Table II | |

| Total ... | 21 | 7800 | 9 | 5175 |

The number of Rights of Occupancy sold for trading and residential purposes during the year numbered 547, a decrease of 27 over 1944, whilst the number of Rights of Occupancy revoked, surrendered or terminated amounted to 129 showing an increase of 9 over the similar figure for the previous year.

No alteration was made in the policy, which has been pursued since the year 1942, that, except in special circumstances, no long term Rights of Occupancy over building plots should be sold.

The following table shows the number of alienations, surrenders, revocations and expirations of Rights of Occupancy granted for trading and residential purposes during the year in each Province:—

| Province | Table I | | Table II | |

For the purpose of comparison, figures for the 5 preceding years are as follows:—

| Year | Sold | Surrendered &c. |
|----------|------|-----------------|
| 1940 ... | 302 | 242 |
| 1941 ... | 260 | 195 |
| 1942 ... | 319 | 160 |
| 1943 ... | 480 | 101 |
| 1944 ... | 574 | 120 |

During the year under review 23 Rights of Occupancy were granted for Mission purposes and School sites and 3 were surrendered. Miscellaneous Rights of Occupancy granted during the year for mining and recreational purposes factory, mill and godown sites, ginnery buying posts and cotton storing posts and labour lines amounted to 142. Seven Rights of Occupancy of this nature were either surrendered, revoked or expired during the year.

19 new Trading Centres were established during 1945.

MINING

General.—The annual value of the Territory's mineral production increased to £1,297,604 which is the third highest year on record as a result of the increased production and value of diamonds. Gold mining suffered from an acute shortage of labour and insufficient supply of mining stores and machinery owing to gold being low on the priority list. The industry kept in full employment 270 Europeans, 190 Asians and 16,640 Africans throughout the year. The Territory, which was closed to prospecting for gold since 1942, was thrown open again in December.

Gold.—Owing to a combination of factors resulting from gold having no priority during the latter part of the war, production declined again slightly as compared with 1944 to a total of 44,874 fine oz. valued at £386,482 from the reef mines and 4,428 fine oz. valued at £38,136 from alluvial workings. The total fine gold and silver refined amounted to 49,303 oz. and 21,749 oz. respectively valued at £427,408.

Lake Province.—The Geita Gold Mining Co. Ltd. continued milling at 200 tons per day. Ridge "8" mine supplied the biggest proportion of ore to the central mill at Geita over the aerial ropeway. Development was carried out on a reduced scale and the sub-level shafts at Geita and Ridge "8" were fully equipped and ready for hoisting when production is increased. It is interesting to note that owing to European miners not being available, considerable responsibility was placed on native headmen who, with careful supervision, maintained efficiency and the accident rate did not rise. Construction work was carried out on the mill extension so that 1,000 tons a day can be treated. Buhemba Mines, Ltd. in the Musoma District con-

tinued their operations with a throughput of a little under 100 tons per day. The original mineral lease holders sold out to the Buhemba company during the year. Stope pillars to a depth of 200 feet have been completely removed. Mr. Nanak Chand operated the old Kilimafedha Mine in the Musoma District and mining methods were considerably improved. Macmel Mines Ltd. at Ruamugaza, south-west of Geita was sold and came under new management. South of Geita Messrs. Ralph and Button continued to develop their mine and milled development ore. Ikungu Mines, Ltd., continued re-treating the tailings at Ikungu. Five other operators treated ore from prospects on a small scale.

Southern Highlands Province.—Alluvial gold produced from alluvial and eluvial sources is now only 20 per cent of that won from the lode mines. New Saza Mines Ltd. mined and treated 250 tons of ore per day, which was at the same rate as for the previous year and recovery was maintained. Further development was carried out. Ntumbi Reefs Ltd. mined and treated 155 tons per day, which is a reduction on 1944, but the value of the ore was unchanged. Lupa (T) Prospecting Syndicate continued operations on a smaller scale. There were only six other operators treating ore from prospects, a reduction of three over 1944. It is very doubtful whether production from alluvial sources can be increased.

Central Province.—Sekenke Mine, owned by Tanganyika Central Gold Mines Ltd. remains dormant. A few tons of ore were mined and treated by Capt. H. E. Rydon. Mr. Edensor completed treating the Kirondatal Mine tailings and removed his plant to Sekenke Mine where he cyanided 220 tons per day for Tanganyika Central Gold Mines Ltd. the mineral lessees.

Western Province.—As the gold from the mineral deposits at Mpanda and Mukwamba will be recovered as a bye-product of lead, Uruwira Goldfields Ltd. changed the name of the company to Uruwira Minerals Ltd. and development will be referred to in future under "lead". This company produced a small amount of gold from the scattered alluvial deposits in this area. In the Kahama District the deposit pegged under claim title at the end of 1944 was developed into a small mine during the year by Mr. J. H. Baker who has named the mine "Canuck". Development carried out during the year was highly satisfactory and a mill was erected. This mine is administered under the Area I Inspectorate.

Diamonds.—The two diamond companies produced 115,620 carats valued at £638,383. The value of production was double that of the previous year due more to the increased world market value of diamonds than to the increase in production. Considerable development, however, was carried out by both companies by mechanization of the workings. The largest stone weighed 67 carats and valued at £2,032. Some large stones of excellent quality were valued at from £110 to £200 a carat. Further plant has been ordered for 1946 and production should be greatly increased when the plant has been installed.

Mica.—A slight reduction in output at 96.19 tons was reported and sold for £90,283. Except for Messrs. T. Bain and Mica Mining (Tanganyika) Ltd. the output is produced from scattered deposits in the Eastern and Central Provinces by small workers.

Tin.—There was little change in the production during the year and 187.48 long tons were produced and sold for £41,218. Scarcity of labour due to poor conditions offered by the small producers still controls activities.

Lead.—Further development on the Mukwamba deposits being carried out by the Uruwira Minerals Ltd. in the Kigoma District continued to give very satisfactory results. Ore reserves have now been re-

calculated and give two million tons of ore existing to an assumed depth of 600 feet. Diamond drilling was commenced in order to further prove the existence of ore in depth and longitudinal extension. Assuming that reduction plant to be erected will treat 1,000 tons of ore per day proved ore reserves give a life of 6½ years. The total indicated reserves, however, judged from geological considerations are considerably higher. A reconnaissance survey for a railway to connect this mine with the Central Railway has been made, also an estimate to the cost of construction.

Salt.—The industry continued to produce salt in the coastal areas by solar evaporation of sea water and the Nyanza Salt Mines at Uvinza in the Kigoma District and the Rukwa Salt Mine (Ivuna) in the Mbeya District by a combination of solar evaporation and evaporation by wood fuel in open boilers. 9,395 long tons valued at £61,213 were produced which is a slight reduction on the previous year. Solar evaporation is dependent on weather conditions and in consequence the production varies from year to year.

Kaolin.—Further mining was carried out on the Pugu deposit and 296 long tons were produced and sold for £3,237.

Coal.—Underground development was carried out by Government on the Namwele Coalfield and two inclined shafts were sunk to a depth of 476 feet and 500 feet. Levels were driven in conjunction with these shafts over a distance of 194 feet. Underground mining operations were completed by the end of November, bulk and detailed samples having been taken and despatched to the Railways and the Imperial Institute, London for testing. Proved tonnage has been assessed at 3,900,000 tons but it is anticipated that this will be considerably increased after the area has been further drilled. Bulk tests of the Namwele coal have proved that without treatment the coal from the seam is unsuitable for Railway use, but could be used for generation of power. Diamond drilling was carried out in the Rukwa Valley from May 1945. Four boreholes were drilled, their maximum depths being 1,198, 927, 372 and 278 feet; the latter two at Muse in the Rukwa Valley in an area adjacent to an outcrop of coal. Further exploratory work will consist of shallow and deep drilling and possibly a geophysical survey.

Corundum.—No further corundum was mined by the Geological Division during the year as sufficient material existed from which abrasive grit and fabricated articles, such as hones for the rubber and sisal industry were made. The Dodoma factory was closed down at the end of the year.

Miscellaneous Minerals.—Stone, sand, lime and clay were produced for local building purposes. Red ochre remains in the hands of the Native Administration in the Arusha District. Production kept pace with local requirements. There was no local demand for phosphatic manure won from the Guano caves in Karroo limestone in the Mbeya District.

Legislation.—Although desirable, amendments to the Mining Ordinance, Mining Regulations, Safe Working Regulations and Diamond Industry Protection Ordinance and Regulations could not be presented to the Legislative Council. A new edition of the Mining Handbook was published in April. The whole Territory was closed to prospecting for radio-active minerals under Government Notice No. 279 of 1st October 1945, and prospecting for reef gold was again permitted by virtue of Government Notice No. 298 of 30th October 1945 effective from 3rd December 1945. This notice continued to control prospecting for reef gold in the Kigoma, Tabora and Ufipa Districts.

Mining Scholarships.—One student was in receipt of the bursary provided by Government for a course at the Bulawayo Technical School. One past student has been in receipt of practical training at the Geita mine.

Owing to the Southern Rhodesian Government reserving all vacancies at the Technical School for Rhodesian ex-servicemen, it was not possible to increase the quota for candidates from this Territory.

IV. Taking the *average* number of prisoners in gaol, how many cubic feet of space are there for each prisoner during the hours of sleep?

And what superficial area?

V. How are the prisoners classified?

VI. Is penal labour—that is, labour by treadmill? crank, or shot drill—in force?

VII. If so, during what periods of imprisonments, in respect of what classes of prisoners, and during how many hours, is such penal labour enforced? In stating hours of treadwheel labour, give, first, the total time on and off at the wheel, etc.; secondly, the length of spells and intervals of rest.

VIII. What kind of labour, other than penal labour, is in use?

IX. If the prisoners are employed beyond the walls of the gaol, state—

1. On what kind of work they are so employed?
2. How are they supervised?
3. How many escapes of prisoners, while being employed beyond the gaol, have taken place during each of the last three years?
4. How the profits of their labour are accounted for?

X. What was the total annual cost of the prison during the year 1945?

XI. What was the annual amount of the prisoners' earnings during 1945?

XII. What is the number of the hours allotted for sleep? And, if sleep is in association, are the dormitories lighted? and how often are they patrolled during the night?

Answers

- (a) No.
(b) By day in gangs; 1 Warder to 5 Convicts.
(c) By night in associated wards and cells, lighted from outside with secured doors and a sentry on guard.
Sentries patrol throughout the night. Female prisoners are segregated from male prisoners.

| Sweet potatoes or fruit (e) | 4 | | |

Penal diet:—12oz. maize daily and water ad libitum.

- NOTES:—(a) Remand prisoners, who do not elect to do domestic labour inside the prison will receive only three-quarters of the allowance above.
 (b) Maize may be whole maize or meal. If meal is machineground it must be freshly prepared. Complaints regarding maize meal are generally due to excessive acidity arising from storage.
 (c) Millet should be issued in place of maize on two days in the week.
 (d) Palm oil is preferred.
 (e) Vegetables and fruits: Green vegetables include carrots and cabbage, native spinach, baobab leaves, leaves of cassava, beans and sweet potatoes. Fruit includes tomatoes, oranges, pawpaw, mangoes and bananas. Failing green vegetables or fruit, half the bean ration must consist of germinated beans.
 It is essential to ensure that green vegetables are not overcooked so as to destroy their protective properties. The water in which they have been cooked contains valuable salts and should not be thrown away. Vegetables should not be cooked for more than forty minutes nor allowed to remain hot for more than one hour before consumption.
 (f) Meat: 8oz. without bone (bone to be allowed for at the rate of one-quarter of the gross weight) may be replaced by 6oz. dried fish (including bone) or 12oz. fresh fish or 3oz. dried sprats (dagaa). Of these the sprats are preferred. The meat may be issued in quantities of 4oz. twice weekly.

NOTE.—Ninety six persons committed for trial before the 1st January, 1945, were dealt with during the year. One person ordered to be tried by a subordinate court under extended jurisdiction in 1944, was tried by the High Court. Figures of these trials are included in the above table. The table does not include figures in respect of one hundred and twenty one persons committed for trial before the 31st December, 1945, whose trials were still pending at that date. Twenty nine of the total number of persons committed for trial were subsequently returned to the subordinate courts for trial; seventeen under section 14 of the Criminal Procedure Code (1930) and section 13 of the Criminal Procedure Code, 1945, in extended jurisdiction and twelve in original jurisdiction. Seventeen informations in respect of charges additional to those on which accused were committed were filed.

MAIL SERVICE

(a)—OCEAN

There is no subsidized or contract service. Payment for the conveyance of overseas mails is made at the rates laid down by the Universal Postal Union.

(b)—By AIR

Mails are conveyed by regular six-times-weekly services between the Territory and South Africa and between the Territory and Great Britain by aircraft operating the Springbok "York" service. This service affords connection at Cairo by air to India, Australasia and the Far East and onwards from Cairo to Great Britain and Europe generally and also to the Americas. A bi-weekly service operated by Central African Airways conveys mail between Kenya and Southern Tanganyika, the Rhodesias and Nyasaland. Internal air Services are maintained by East African Airways Corporation for the exchange of mails within Kenya and between Kenya and Uganda and Tanganyika Territory and Zanzibar.
